Claims 1 – 23 and 29 – 36 (cancelled)

24. (original) A process for fabricating a dental material comprising:
mixing ceramic powder and one or more media together to achieve homogeneity
throughout the mixture;

feeding the mixture to a dispensing apparatus; and
dispensing the mixture from a dispensing apparatus onto a build platform to form
a dental material.

25. (original) The process of claim 24 wherein the ceramic powder and one or
more media mixture is formed into a feed stock material prior to feeding to the
dispensing apparatus.

26. (original) The process of claim 24 wherein the ceramic powder comprises a
material selected from alumina, zirconia, mullite, spinel, glass-ceramic, porcelain, titania,
lithium disilicate, leucite, amorphous glass, lithium phosphate, and mixtures thereof.

27. (original) The process of claim 24 wherein the one or more media comprises
a silicone polymer.

28. (original) A dental restoration formed by the method of claim 24.
